Education

Sathyabama Institute of Science and technology   June 2019 - June 2023
Bachelor of Engineering (B.E) in Computer Science and Engineering//(9.0CGPA)   *Chennai, TamilNadu*

Skills

Languages: C, C++, Java, JavaScript, HTML, CSS
Libraries / Frameworks: React, Node, Express, JQuery, Bootstraps
Databases: MySql, MongoDB

Internships, Freelancer and Open Source Contributions

Managed Network Expert   August 2021 – December 2021
Chegg India (freelancer)
- Clarified students' doubts related to coding and computer science.
- Solved a number of coding problems and also gave a descriptive explanation of them.

Project Mentor   June 2021 – July 2021
LetsGrowMore
- Mentored for movie streaming opensource project.
- Reviewed Pull requests and merged them and helped the participants in the project with their queries.

Instructor   March 2021 – July 2021
Hash Hack Code (Internship)
- Instructed front-end development to the students.
- Helped the students in troubleshooting the errors.
- Gave assignments and reviewed them.

Open Source Contributor   February 2021 – May 2021
Cross Winter of code and Girl Script summer of code
- Contributed to the web development project(DevTernShip) and Data Structures and Algorithms.
- Worked on wire framework and also built some parts of the website.
- Developed algorithms for Data Structures and algorithm project.

Projects

Food Order App | *React, Redux, Firebase*
- Implemented a Food Order Application using React, Redux, and Firebase for the backend.
- User can order the food items which are mentioned on the website.
- Ordered food items and other details will be sent to the firebase to deliver the order.

Movie List App | *React, Firebase*
- Implemented Movies list Application using React and Firebase for backend
- We can add our own movies list and it will store it in the firebase.
- Automatically it will fetch from the database and display it on the screen.

Chat Box | *React, React Chat Engine, Firebase*
- Implemented real-time chat application using React, React Chat Engine, and Firebase.
- we can have a group chat, create new groups, and only admin can add new people fully secured.

Expense Tracker | *React*
- Created an expense tracker using react
- It help's us to track our expenses and it also displays the graph based on our expenses.

Forkify | *Vanilla JavaScript*
- Developed a forkify application using Vanilla JavaScript.
- It fetches the food recipes through API and even user can also add their own.

Volunteer Experience

- Beta Microsoft Learn Student Ambassador, AngelHack Student Ambassador (India)
- Lead @ Hack Club and Code for Cause
- Ex-Management Team Member @ Google Developer's student club, Ex-Community Manager @ CodXCrypt Community
